

Spaces

- How spaces define feature visibility
- How spaces are used to organize saved objects
 - Only the objects within the active space are visible
 - Create the objects within the appropriate space
 - Or alternatively copy them between spaces

Users & Roles

- How to create and manage users
- Built-in and custom roles
- Configuring Elasticsearch and Kibana privileges with roles
 - Including access levels to features
- How the combination of space and role privileges affect feature visibility
- How multiple role privileges are merged
